MEDICAL SCHOOL

NeuroRehabilitation

June 15-17 • Waltham, MA

2017

Stroke • Concussion • TBI • SCI • Degenerative Neurological Diseases

State-of-the-Art Rehabilitation Strategies and Practices to:

- Accelerate recovery
- Improve clinical skills
- Reduce symptoms
- Advance patient well-being
- Elevate patients to their maximum level of function

Earn up to 15.00 *AMA PRA Category 1 Credits™*

15.5 hours of continuing education credit for PTs, OTs, SLPs

Updates, Innovations, and Best Practices for

Physiatrists	PTs	Neuropsychologists
Neurologists	OTs	Clinical Psychologists
Psychiatrists	SLPs	Mental Health Counselors
Internists	NPs	Clinical Social Workers
Geriatricians	PAs	Case Managers
Family Practitioners	Nurses

HARVARD MEDICAL SCHOOL

Dear Colleague,

Patients with stroke, TBI, SCI, and degenerative neurological diseases face significant disruption to so many facets of their lives, and clinicians are left with so many treatment dimensions to consider, that rehabilitation is never simple. These challenges are compounded by the fact that rehabilitation approaches are now in a period of rapid expansion. It's difficult to stay current with, choose, and use the best options for neurorehabilitation—yet this is key to optimizing patient outcomes.

It's with these challenges in mind that we are introducing this exciting new program: NeuroRehabilitation 2017. Many of the country's most experienced and committed neurorehabilitation experts will present practical, cutting-edge clinical interventions to further your expertise in guiding patients to their maximum level of function. Participants will learn of state-of-the-art research and its application to clinical practice in such diverse topics as exercise, pharmacology, technology, wellness, integrative medicine, patient motivation, and caregiver assistance.

Clinicians who provide care for patients with CNS trauma and neurological diseases can rely on this new update for proven practices and take-home tools to heighten your success in effectively and efficiently helping your patients gain the skills that will improve their health and quality of life.

Our goal is to provide an experience that inspires you, advances your knowledge and skills, and arms you with new approaches and ideas to accelerate and enhance your patient outcomes.

We look forward to seeing you in Boston in June.

Ross Zafonte, DO

Mel Glenn, MD

Yelena Bodien, PhD

Who Should Attend

Physicians

- Psychiatrists
- Neurologists
- Psychiatrists
- Internists
- Geriatricians
- Family Practitioners

Allied Health

Professionals

- Physical Therapists
- Occupational Therapists
- Speech-Language Pathologists
- Nurse Practitioners
- Physician Assistants
- Nurses

Mental and Other Health

Professionals

- Neuropsychologists
- Clinical Psychologists
- Mental Health Counselors
- Clinical Social Workers
- Case Managers

Course Faculty

Course Directors

Ross Zafonte, DO

Vice President of Medical Affairs, Research and Education, Spaulding Rehabilitation Network
Chief, Physical Medicine and Rehabilitation, Massachusetts General Hospital

NeuroRehabilitation 2017

Expanded pharmacologic interventions
Advances in concussion management
Early mobilization in the ICU
Wellness interventions
Functional neuroimaging
Neuroendocrine treatment
Sports and exercise
Functional electrical stimulation
Stem cells for SCI
Motivational interviewing
Integrative medicine approaches
Music therapy
Novel and evolving treatment options

Course Description

As neurorehabilitation evolves, it is more challenging for clinicians to maintain state-of-the-art care of their patients. This course will use plenary lectures and smaller breakout sessions, including interactive case-based workshops, to update the audience on medical, psychological, physical, and cognitive approaches to neurorehabilitation. Based on their participation in the course, participants will be able to expand their clinical knowledge and enhance those skills needed to maximize the physical, cognitive, and social function of patients with traumatic brain injury, spinal cord injury, stroke, and neurodegenerative disease. Participants will learn of state-of-the-art research and its application to clinical practice in such diverse topics as exercise, pharmacology, technology, wellness, integrative medicine, patient motivation, and caregiver assistance.

Learning Objectives

Upon completion of this course, participants will be able to:

- Summarize the research evidence base for neurorehabilitation practice.
- Integrate state-of-the-art evidence-based approaches to neurorehabilitation into their care of patients.
- Evaluate advances in research that will lead to future approaches to neurorehabilitation.

Accreditation

PHYSICIANS

The Harvard Medical School is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Harvard Medical School designates this live activity for a maximum of 15.00 *AMA PRA Category 1 Credits*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

PHYSICAL THERAPISTS, SPEECH-LANGUAGE PATHOLOGISTS, and OCCUPATIONAL THERAPISTS

This educational program has been approved for continuing education credits (CEUs). Please visit the course website for details.

CANADIAN ACCREDITATION

The Royal College of Physicians and Surgeons of Canada recognizes conferences and workshops held outside of Canada that are developed by a university, academy, hospital, specialty society or college as accredited group learning activities.

EUROPEAN ACCREDITATION

Through an agreement between the American Medical Association and the European Union of Medical Specialists, physicians may convert *AMA PRA Category 1 Credit*[™] to an equivalent number of European CME Credits[®] (ECMECs[®]). Information on the process of converting *AMA PRA Category 1 Credits*[™] to ECMECs[®] can be found at: www.eaccme.eu.

ABMS/ACGME COMPETENCIES

This course is designed to meet one or more of the following American Board of Medical Specialties and Accreditation Council of Graduate Medical Education competencies: patient care and procedural skills, medical knowledge, and practice-based learning and improvement.

IOM COMPETENCIES

This course is designed to meet one or more of the following Institute of Medicine competencies: provide patient-centered care, and employ evidence-based practice.

12:50 pm	Lunch Buffet (provided)
2:00 pm	Case-Based and Interactive Breakout Sessions 3A-3C <i>Each of these sessions includes 10 minutes of Q&A</i>
3A	Chronic Traumatic Encephalopathy Ross Zafonte, DO
3B	Addressing the Challenges of Early Mobilization of the Stroke Patient in the ICU Nicole Mazwi, MD
3C	Cardiopulmonary Issues after SCI: 2017 Update Sunil Sabharwal, MD
2:55 pm	Case-Based and Interactive Breakout Sessions 4A-4C <i>Each of these sessions includes 10 minutes of Q&A</i>
4A	Are You Accounting for Neuroendocrine Disorders after TBI? Seth Herman, MD
4B	Exercise for Patients with Parkinson's Disease Ronald Hirschberg, MD
4C	Brain-Computer Interfaces Leigh Hochberg, MD, PhD
3:45 pm	Break (refreshments provided)
4:15 pm	Case-Based and Interactive Breakout Sessions 5A-5C <i>Each of these sessions includes 10 minutes of Q&A</i>
5A	Vestibular Rehabilitation following TBI Kathryn MacDonald, PT, DPT
5B	Constraint-Induced Language Therapy Marianne Savastano, MS, CCC-SLP
5C	Recovery Trials in SCI Shanker Nesathurai, MD
5:05 pm	Daily Program Ends

Friday • June 16

7:30 am	Continental Breakfast
8:30 am	TMS and tDCS to Facilitate Recovery in Disorders of the Central Nervous System Felipe Fregni, MD, PhD and Leon Morales-Quezada, MD, PhD
9:10 am	Q&A with Dr. Fregni and Dr. Morales-Quezada
9:20 am	Transition to Breakouts
9:25 am	Case-Based and Interactive Breakout Sessions 6A-6C <i>Each of these sessions includes 10 minutes of Q&A</i>
6A	The Benefits of Music Therapy in Neurorehabilitation Brian Harris, MA, MT-BC, NMT/F
6B	Phenol and Botulinum Toxin after Stroke and Neurodegenerative Disease Mel Glenn, MD
6C	Functional Electrical Stimulation for Exercise after SCI J. Andrew Taylor, PhD
10:15 am	Break (refreshments provided)
10:45 am	Case-Based and Interactive Breakout Sessions 7A-7C <i>Each of these sessions includes 10 minutes of Q&A</i>
7A	Helping Survivors to Build Their "New Normal" after TBI Christopher Carter, PsyD
7B	Robotics in Rehabilitation following Stroke Paolo Bonato, PhD
7C	Sports and Exercise for People with SCI Cheri Blauwet, MD
11:35 am	Transition to General Session Room
11:40 am	Meeting the Evolving Needs of the Caregiver Marilyn Spivack and Christopher Carter, PsyD
12:20 pm	Q&A with Ms. Spivack and Dr. Carter
12:40 pm	Lunch Buffet (provided)
2:00 pm	Case-Based and Interactive Breakout Sessions 8A-8C <i>Each of these sessions includes 10 minutes of Q&A</i>
8A	Functional Neuroimaging in Disorders of Consciousness Yelena Guller Bodien, PhD
8B	Challenges in the Rehabilitation of the Young Patient with Stroke Randie Black-Schaffer, MD
8C	Upper Extremity Surgery in Tetraplegia Chaitanya Mudgal, MD
2:55 pm	Case-Based and Interactive Breakout Sessions 9A-9C <i>Each of these sessions includes 10 minutes of Q&A</i>
9A	Rehabilitation of Visual Disorders after Stroke Kevin Houston, OD
9B	Treating the Patient with CNS Lyme Disease and Other Tick-Borne Illness Nevena Zubcevik, DO
9C	Sexuality after SCI Marcalee Sipski Alexander, MD
3:45 pm	Break (refreshments provided)
4:15 pm	Case-Based and Interactive Breakout Sessions 10A-10C <i>Each of these sessions includes 10 minutes of Q&A</i>
10A	Evaluation and Management of Patients with Disorders of Consciousness: State of the Science Joseph Giacino, PhD
10B	Social Cognition and Affective Processing in Neurodegenerative Disease Brad Dickerson, MD
10C	Restoring Ambulation Post-SCI and the Impact of Technology Marcalee Sipski Alexander, MD
5:05 pm	Daily Program Ends

7:30 am	Continental Breakfast
8:30 am	Integrative Medicine Approaches in Neurorehabilitation Ariana Vora, MD
9:10 am	Q&A with Dr. Vora
9:20 am	Transition to Breakouts
9:25 am	Case-Based and Interactive Breakout Sessions 11A-11C <i>Each of these sessions includes 10 minutes of Q&A</i>
11A	Psychopharmacologic Approaches to Attention, Alertness, and Initiation after Brain Injury Mel Glenn, MD
11B	Current and Future Treatment of Alzheimer's Disease Jonathan Jackson, PhD
11C	Bone Health after SCI: Monitoring, Management, and Potential Therapies Rajiv Gupta, MD
10:15 am	Break (refreshments provided)
10:50 am	Case-Based and Interactive Breakout Sessions 12A-12C <i>Each of these sessions includes 10 minutes of Q&A</i>
12A	Psychopharmacologic Approaches to Affective Disorders and Executive Dysfunction after Brain Injury Mel Glenn, MD
12B	The Rehabilitation of Spatial Neglect following Stroke Yong-Tae Lee, MD
12C	Plasticity of Sensorimotor Systems after Incomplete SCI Jonathan Wolpaw, MD
11:40 am	Transition to General Session Room
11:45 am	The Postacute Continuum of Care: Where Are We Heading? Randie Black-Schaffer, MD
12:25 pm	Q&A with Dr. Black-Schaffer
12:35 pm	Closing Remarks Mel Glenn, MD
12:45 pm	Course Concludes

DISCLAIMER

CME activities sponsored by Harvard Medical School are offered solely for educational purposes and do not constitute any form of certification of competency. Practitioners should always consult additional sources of information and exercise their best professional judgment before making clinical decisions of any kind.

DISCLOSURE POLICY

Harvard Medical School (HMS) adheres to all ACCME Essential Areas, Standards, and Policies. It is HMS's policy that those who have influenced the content of a CME activity (e.g., planners, faculty, reviewers, and others) disclose all relevant financial relationships with commercial entities so that HMS may identify and resolve any conflicts of interest prior to the activity. These disclosures will be provided in the activity materials along with disclosure of any commercial support received for the activity. Additionally, faculty members have been instructed to disclose any limitations of data and unlabeled or investigational uses of products during their presentations.

How to enhance and accelerate recovery with:

- Pharmacologic interventions
- Transcranial magnetic and direct current stimulation
- Early mobilization in the ICU
- Approaches to bone health after SCI
- Chemical denervation procedures
- Neuroendocrine treatment
- Functional electrical stimulation
- Neuromuscular electrical stimulation
- Upper extremity muscle-tendon transfers
- Approaches to ambulation after SCI
- Vestibular rehabilitation
- Visual rehabilitation
- Treatment of hemispatial neglect
- Constraint-induced language therapy
- Treatment of adjustment issues
- Music therapy
- Exercise for people with Parkinson's disease

New strategies to improve quality of life

- Wellness interventions
- Motivational interviewing
- Alternative medicine approaches
- Adjustment of the caregiver
- Sports and exercise
- Treatment of the post-stroke shoulder
- Addressing sexuality after SCI

Education on evolving treatment options

This program offers attendees the opportunity to learn about the future of treatment options and how and when they will impact patient outcomes:

- Stem cells
- Brain-computer interface
- Functional neuroimaging to communicate with patients with disorders of consciousness
- Changes in the continuum of care
- Harnessing the placebo effect
- Alzheimer's disease therapies
- Acute SCI treatments

Updates and insights to guide clinical decisions for common, rare, and challenging neurological conditions

- The patient with post-concussion symptoms
- Chronic traumatic encephalopathy
- CNS plasticity
- Aging with SCI
- The young stroke patient
- Social cognition and affective processing in neurodegenerative diseases
- The patient with CNS Lyme disease

NeuroRehabilitation 2017

(Course #734714-1702)

	Register after April 30, 2017	Register on or before April 30, 2017
Course Tuition	\$895	\$795 (SAVE \$100)
Residents, Fellows, and Students	\$745	\$645 (SAVE \$100)

Your tuition includes breakfast each day, morning and afternoon refreshments, buffet lunch on Thursday and Friday, and the course syllabus both online and on flash drive. Parking is free of charge, and free Wi-Fi is provided in the meeting rooms.

REGISTRATION, PAYMENT, CONFIRMATION, and REFUND POLICY

Registrations for Harvard Medical School CME programs are made via our secure online registration system. To register for this course, please visit the course website.

At the end of the registration process, a \$5 non-refundable processing fee will be added to your registration, and you will have the choice of paying by check or credit card (Visa, MasterCard, or American Express). If you are paying by check, the online registration system will provide you with instructions and a printable form for remitting your course fees by check. Postal, telephone, fax, and cash-payment registrations are not accepted. Fees shown in USD.

Upon receipt of your paid registration, an email confirmation from the HMS DCE office will be sent to you. Be sure to include an email address that you check frequently. Your email address is used for critical information, including registration confirmation, evaluation, and certificate. Refunds, less an administrative fee of \$75, will be issued for all cancellations received two weeks prior to the start of the course. Refund requests must be received by postal mail, email, or fax. No refund will be issued should cancellation occur less than two weeks prior. "No shows" are subject to the full course fee and no refunds will be issued once the conference has started.

ACCOMMODATIONS

The Westin Waltham Boston

70 Third Avenue, Waltham, MA 02451
781-290-5600

A limited number of rooms have been reserved at the Westin Waltham Boston until May 12, 2017 for the discounted rate of \$199 per night. Please call (781) 290-5600 when making reservations, and be sure to specify that you are enrolled in the course NeuroRehabilitation 2017 to receive the reduced room rate.

Embassy Suites by Hilton Boston Waltham

550 Winter Street, Waltham, MA 02451 • 781-890-6767

A limited number of rooms have been reserved at the Embassy Suites by Hilton Boston Waltham until May 15, 2017 for the discounted rate of \$199 per night. Please call (781) 890-6767 when making reservations, and be sure to specify that you are enrolled in the course NeuroRehabilitation 2017 to receive the reduced room rate.

Please do not make non-refundable travel arrangements until you have received an email from our office confirming your paid registration.

VENUE

The Conference Center at Waltham Woods
860 Winter Street • Waltham, MA 02451
